Objective: I am seeking a challenging role in Cybersecurity where I can apply my skills in customer service, Python, Java, C/C++, SQL, and cybersecurity. Eager to contribute to safeguarding digital landscapes and fortifying cyber defenses to protect against evolving threats.

Qualifications:

- Experienced IT professional contributing creatively to project management and decision-making teams.
- Well-versed in cybersecurity trends, IT infrastructure, troubleshooting, and system enhancement.
- Self-motivated, quick learner and dedicated team player committed to delivering excellence.
- Skilled in building rapport with clients and colleagues, with a strong background in customer service.
- Proficient in Python, Java, C/C++, SQL, and cybersecurity principles.
- Experienced in Microsoft Word, Excel, PowerPoint, and conducting internet research.

Education:

California Lutheran University, Thousand Oaks, CA

Bachelor of Science in Computer Science, May 2024

(Currently Pursuing) Masters in Information Technology - Cyber Security

Relevant Coursework:

- Cybersecurity Fundamentals: Explored foundational concepts in cybersecurity, including network security, cryptography, and threat detection.
- Information Security Management: Studied principles of information security governance, risk management, and compliance.
- Incident Response and Digital Forensics: Acquired skills in responding to cybersecurity incidents, conducting digital investigations, and preserving digital evidence.
- Network Defense and Security Operations: Covered strategies for defending against cyber threats, monitoring network traffic, and managing security incidents.
- Cybersecurity Risk Assessment and Management: Examined methods for identifying and assessing cybersecurity risks, developing risk mitigation strategies, and implementing risk management framework.

Experience:

California Lutheran University

IT Technician

- Technical Support: Provided technical assistance and support to end-users, including troubleshooting hardware and software issues, resolving network connectivity problems, and assisting with system configurations.
- Hardware Maintenance: Installed, configured, and maintained computer hardware components such as desktops, laptops, printers, and peripherals. Conducted routine maintenance and repairs to ensure optimal performance.
- Software Installation and Updates: Installed, upgraded, and configured operating systems, software applications, and antivirus programs.
- Network Administration: Assisted in the administration of local area networks (LANs) and wide area networks (WANs), including setting up user accounts, permissions, and access rights..
- Security Management: Implemented security measures to protect computer systems, data, and networks from unauthorized access, viruses, and malware. Conducted regular security audits and updates to ensure compliance with security policies and procedures.
